Cabinet Wrap Care Sheet

For basic cleaning of the wraps, a mild soap and water solution with a microfiber towel will handle most needs (i.e. road grime, etc.)

STICKER REMOVAL

- To remove sticker, carefully peel edge of sticker from the cabinet, parallel to surface.
- Clean remaining adhesive with 90% + Isopropyl Alcohol (rubbing alcohol). For resilient/stronger adhesives a mild citrus-base adhesive remover can be used (ex. Goo-Gone).
- Using towel/rag, saturate the adhesive and let sit for :30 seconds, then wipe adhesive. Repeat if necessary.
- Immediately after use of cleaner, wipe down with a mixture of a Dawn soap & water; this will neutralize the cleaner and prevent any further contact with the graffiti-resistant laminate.

MARKER REMOVAL

- A 90% + Isopropyl alcohol (rubbing alcohol) solution will remove most markers.
- For difficult to remove markers we recommend using a mild graffiti remover such as, Graffiti Safe-wipes, or TSW Multimaster/TSW Neutralizer (both of which we sell or you can purchase online).
- Using towel/rag, saturate the tag and let sit for :30 seconds, then wipe adhesive. Repeat if necessary.
- Immediately after use of cleaner, wipe down with a mixture of a Dawn soap & water; this will neutralize the cleaner and prevent any further contact with the graffiti-resistant laminate.

SPRAY PAINT REMOVAL

- Removal should be done with Graffiti Safe-wipes, or TSW Multimaster/TSW Neutralizer (both of which we sell or you can purchase online).
 - Wearing gloves and protective eye-wear, Spray TSW on the spray painted area.
 - Wipe away TSW and spray paint as soon as paint softens.
 - Spray TSW neutralizer onto surface immediately and wipe clean.
- Using graffiti wipes to clean spray paint from the cabinet:
 - Wearing gloves and protective eye-wear, wipe spray paint until removed.
 - Use a rag to remove the paint as it is being removed.
- Immediately after use of cleaner, wipe down with a mixture of a Dawn soap & water; this will neutralize the cleaner and prevent any further contact with the graffiti-resistant laminate.
