

CITY BEAUTIFICATION

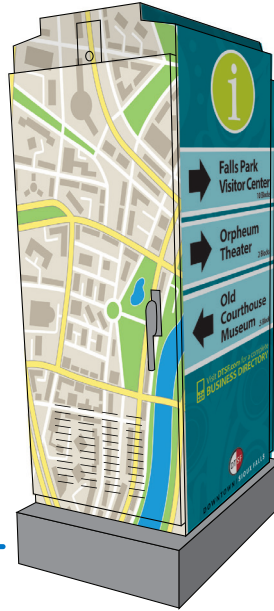

Make your City's cabinets go from an eye sore to a preventative piece of art! With endless possibilities of designs such as Local Art, Way Finding, Historic Imagery, Faux Textures and more.

Provided by Econolite and Clean Slate Group

Local Art can be a great way to spruce up your City's traffic cabinets! Artwork can range from paintings, drawings, screen prints to photography and sculpture and so much more! Artwork is also a great way to incorporate and engage the community in your City Beautification Project.

LOCAL ART

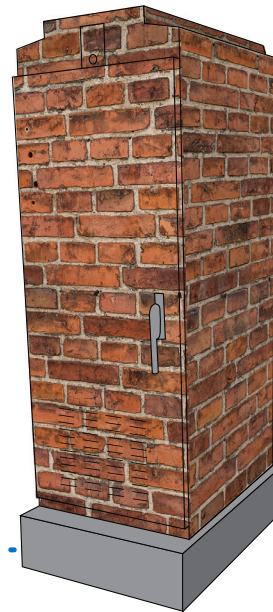

Way Finding is a great way to help your City's Department of Tourism, to give visitors the best experience possible, implementing systems that guide visitors through parks, historic sites and urban centers in a straight-forward manner. They're also an effective way for cities to promote their brand.

WAYFINDING

Historic Imagery can be a great option for any City wanting to show off their proud history, especially in any historic districts. These are great to also include a small snippet of history to really engage your community with your City Beautification Project.

HISTORICAL

Faux Texture can help 'camouflage' your City's cabinets into the surrounding landscapes whether it be urban or a bit rural. There are endless possibilities to help blend your cabinets into your City's Natural Beauty.
